New look for Fusion Menu on November 6th

Desjardins Insurance is pleased to announce that the Fusion Illustration software update on November 6 will include a new main menu, redesigned to give you quick access to frequently used tools and content.

The content that is currently available in the menu will remain the same, so you can continue to create illustrations for our Insurance and Savings products; however, you'll now have more options to help you.

Here's a summary of the changes:

- New look ? The new visual will be consistent with the Desjardins Insurance brand.
- New layout ? You will be able to view the entire Individual Insurance and Savings product offer at a glance.
- New sales support sections ? Quick links that include a [WEB] reference will direct you to frequently accessed sections of Webi and the Desjardins Insurance website. No password is required for these sections.
- Direct link to the Pending Business application ? The Pending Business application will be accessible from the new Fusion menu. You'll need to log on using your Webi User ID and password.
- What's New section ? Stay on top of what's new after every Fusion update by referring to the summary of changes on this page.
- Contact Us section ? Here you will find contact details for all departments whose services are at your disposal.

Desjardins Insurance is confident that these changes will allow you to work more efficiently to better serve your clients.
